**Title :** Assessment of the state of preservation of in-service steam boilers and super-heated water generators for the periodic integrity inspection  
**Scope :** The standard defines the procedures and minimum requirements for carrying out the assessment of the state of preservation of in-service steam and/or superheated water generators, preparatory to periodic integrity inspection.  
The standard applies to generators for which there is an obligation to conduct the integrity inspection in accordance with Ministerial Decree 329/2004, art. 12, scheduled after a certain period of operation. The standard is also applicable to checks aimed at determining further operability in the interval between periodic integrity inspections.  
The standard does not deal with:  
- the check methods of elements applied on the generators during temporary repairs;  
- checks aimed at determining the residual life of the generator.

**Scope :** In the NTA, non-free-sailing rafts that are propelled by muscle power for play purposes in the open air or under supervision will be included. Such play rafts must be inspected in the Netherlands (Commodities Act Decree on attraction and play equipment), but they do not fall under a European set of standards. In order to be able to inspect after all, the designated inspection bodies (AKIs) therefore resort in practice to criteria from other standards, including those for water equipment and playground equipment. However, none of these standards adequately cover the risks of this moving, water-bound playground equipment. The aim is therefore to develop an NTA specifically for play rafts.

Title : Water quality. Biological analysis of surface water

Scope : This standard specifies the determination (collection, sample processing and analysis) of bioeston (producers and consumers), phytoplankton, zooplankton, abioeston, benthos (phytobenthos and benthic invertebrates) and aquatic macrophytes. These methods will provide basic information about the qualitative and quantitative composition of the mentioned communities.

Title : Visual inspection and technical maintenance of the territory, building structures, equipment and engineering networks of multi-residential buildings

Scope : This standard gives guidance on the safe operation of multi-residential buildings to prevent the occurrence of hazards. The standard determines the periodicity, timeframes, types of work, framework, organization, and technical documentation of the visual inspection of multi-apartment residential buildings. The document applies to persons authorized by the community of apartment owners of multi-residential building to perform these works.
