**Country :** Italy  
**Project ID :** 01612340/0001 Project Established  
**ICS :** 67.180.10  
**National Ref :** UNI1612340  
**Title :** Honey- Identification of adulteration of chestnut, wildflower and acacia honey with inulin, invert sugar and corn/malt syrup by <sup>1</sup>H-NMR nuclear magnetic resonance  
**Scope :** This standard describes a procedure for the identification and quantification of added adulterant sugars in honey samples. This standard applies to the botanical varieties of acacia, chestnut and polyflower honey, and allows to identify additions of exogenous sugars such as corn/malt syrup, inulin and invert sugar, in concentrations higher than 10% (w/w). The standard is based on the analytical technique of Nuclear Magnetic Resonance (NMR) which allows the identification and quantification of added sugars.

**Title :** Protection of timber used in buildings - Part 4: Control and remediation measures against fungal decay and insect attack  
**Scope :** This ÖNORM specifies requirements that must be observed in the control and remediation of an existing infestation by wood-destroying fungi or insects.  
This ÖNORM is to be applied together with ÖNORM B 3801, ÖNORM B 3802-1, ÖNORM B 3802-2 and ÖNORM B 3802-3.

This ÖNORM deals with components and structures made of solid wood, bonded wood and wood-based materials.

The requirements of this ÖNORM apply to both statically load-bearing and non-load-bearing timber components.

The application of ÖNORM to other wood areas such as furniture, fixtures, works of art and the like is recommended.

Control measures against termites, ants and remediation measures in case of mould infestation are not subject of this ÖNORM.

<b>Title :</b>	Metrology. Part 2: Vocabulary of terms in legal metrology		
<b>Scope :</b>	<p>The set of terms and definitions in this vocabulary is related to various aspects of legal metrology which are dealt with in OIML publications. However, this vocabulary was developed to be compatible with fundamental metrological publications, first of all the International vocabulary of metrology – Basic and general concepts and associated terms (VIM), so it can be used not only within the OIML.</p> <p>This vocabulary is meant as a reference for metrologists as well as for other specialists involved in various activities pertaining to legal metrology – from measurement and legal metrological control to legislation. It can also be a reference for governmental and intergovernmental bodies, trade associations, manufacturers of measuring instruments and users of metrological services.</p> <p>It is intended to contribute to the global harmonization of the terminology used in (legal) metrology.</p>

**Title :** Emission measurements at small firing installations – Part 2: Measurements at installations for solid fuel (VDI 4207-2:2016, modified)  
**Scope :** This technical specification sets out the requirements for the initial, periodic and exceptional measurement of emissions and flue gas parameters of small firing installations for solid fuels according to Decree on the inspection, cleaning and measurement of small combustion

---

---

units. It applies to the determination of gaseous and particulate emissions from such installations. In addition, it describes the control activities associated with the installation and operation that must be carried out in advance in order to ensure the proper execution of the emission measurements. Annex A deals with the particular requirements for solid fuel-fired single-room heating appliances.

Title : Control interfaces of fixed automatic fire detection and fire alarm systems to fire protection systems - Guideline for classification, functional requirements and control methodologies

Scope : The technical report schematically classifies the control interfaces of fixed automatic fire detection and fire alarm systems to fire protection systems, defining the recommended requirements for these interfaces and clarifying the nature of signalling, commands and information exchanges between functions G and H of EN 54-1:2021. Furthermore, this technical report provides a guideline for conducting the initial inspection and testing of these interfaces and their periodic controls and testing.
