**Project ID :** P0055249/0001 **Draft for public enquiry**

**ICS :**

**National Ref :** PNE 127050

**Title :** Industrialized construction systems for buildings made from precast concrete products. Performance, production, installation and verification requirements.

**Scope :** This standard defines the requirements for the behaviour, manufacture, installation and verification of industrialized systems for buildings built from prefabricated concrete elements.

Compliance with these requirements shall provide the industrialized system with the characteristics and performance necessary to comply, by itself or by adding other complementary elements (e.g. thermal insulation, sound insulation, waterproofing elements), with the regulatory and functional requirements applicable to them in each case. Where the industrialized system needs the addition of these complementary elements to meet these requirements, this standard provides for the possibility of such addition occurring in the factory by incorporating the complementary elements into the prefabricated concrete elements, or by incorporating them during the assembly of the

---

industrialized system itself.

This standard does not include particular requirements applicable to these supplementary elements.

 National Ref : NEN 5633:2021 Concept nl  
 Title : Radioactivity measurements - Sampling of vegetables and fruit  
 Scope : This standard describes the sampling of vegetables and fruit for consumption for the purpose of radioactivity measurements. Mushrooms, herbs and capers, etc. can also be sampled in accordance with this standard. The standard can be used for sampling in the field or of already harvested products (e.g. shops, auctions, ports). To determine the deposition a grass sample is used, see NEN 5624. The samples taken can be used for various measurements, after possible sample preparation in accordance with NEN 5634.
