Title : Cable accessories. Connection assemblies to be used in underground distribution networks with cables of rated voltage 0,6/1 kV

Scope : This standard establishes the characteristics that connection assemblies (enclosure and connection element) for underground low-voltage electrical distribution networks shall comply and the tests that shall be passed.

This standard is applicable to connection assemblies (enclosure and connection element) for splices, derivations and terminations of single-pole cables with aluminium conductors, according to the UNE-HD 603 Standards, parts 5N and 5X.

The designation of the preferred constructions of the accessories of this standard indicates the range of maximum and minimum admissible sections of each model. It does not imply that the accessory is designed to be used in all intermediate sections.

This standard is not extended to the connection elements supplied independently included in the UNE 211024 Standard, nor to the isolated connections included in the UNE 211022 Standard.

**Title :** Low-voltage switchgear and controlgear. Ancillary equipment. Terminal block assemblies for testing kW-h meters.  
**Scope :** This standard specifies the requirements for the Terminal Block Assemblies intended for checking and changing the energy measuring devices, both for Low and High Voltage supplies. Such units are also known as Test Block Units (TBUs) and are intended to be fitted and connected between transformers and the measuring equipment, where indirect or semi-direct measuring is involved, and between the feeding installation and the individual outgoing connection, where direct measuring is involved.

It applies to Test Block Units intended to connect round copper conductors with or without a special preparation, having a cross section between 1,5 mm<sup>2</sup> and 35 mm<sup>2</sup>, intended to be used in circuits of a rated voltage not exceeding 400 V a.c. up to 1000 Hz.

This standard can also be used as a guide for Test Block Units as intended for checking protection equipment.
