Sector A : SERVICES

Register issued on : 2022-07-08

**Subsector A09: FACILITY MANAGEMENT**

<b>Subsector :</b>	A09	<b>Registration Date :</b>	2022-06-24
<b>Organization :</b>	ASI		
<b>Country :</b>	Austria		
<b>Project ID :</b>	01000179/0001		Project Established
<b>ICS :</b>	91.040.01		
<b>National Ref :</b>	ÖNORM B 1301		
<b>Title :</b>	Object safety tests for non-residential buildings - Regular test routines in the course of visual inspections and assessments - Principles and check lists		
<b>Scope :</b>	The present Austrian Standard represents a collection of technical rules for the anticipatory holistic consideration of physical security and for the provable implementation of relevant inspections concerning mandatory and required caution in non-residential buildings (processed organizational knowledge on building security). The physical security inspection routines listed in this ÖNORM can be applied to non-residential buildings in the field of building construction. Residential buildings according to ÖNORM B 1300 as well as buildings in the field of civil engineering are not covered by this ÖNORM. Furthermore, this Austrian Standard does not apply to production plants operating within buildings which are subject to official approval procedures concerning factory management. Possible official procedure steps are not dealt with by this ÖNORM.

**Subsector A12: CONSULTANCY SERVICES**

<b>Subsector :</b>	A12	<b>Registration Date :</b>	2022-06-13
<b>Organization :</b>	SN		
<b>Country :</b>	Norway		
<b>Project ID :</b>	NOT22006/0001		Draft for public enquiry
<b>ICS :</b>	03.100.30		
<b>National Ref :</b>	NS 11251		
<b>Title :</b>	Basic competency requirements for coaches		
<b>Scope :</b>	This standard outlines basic competency requirements for coaches, regardless of their speciality.		
<b>Relatedness :</b>			
<b>National :</b>	New		

\*\* End of Subsector \*\*

**Subsector A99: UNDETERMINED**

<b>Subsector :</b>	A99	<b>Registration Date :</b>	2022-06-28
<b>Organization :</b>	UNI		
<b>Country :</b>	Italy		
<b>Project ID :</b>	01610783/0001		Project Established
<b>ICS :</b>	03.040		
<b>National Ref :</b>	UNI1610783		
<b>Title :</b>	Non-regulated professions - Family mediator - Knowledge, skill, autonomy and responsibility requirements		
<b>Scope :</b>	This standard specifies a proper and unambiguous reference of the professional family		

mediator, establishing also a standardization of training programs promoted by public and/or private boards in order to ensure a level of quality of training and to guarantee the user in meeting mediators with an adequate experience and to guarantee the professionals themselves.

This standard also specifies and updates the requirements for the professionals of family mediation in terms of knowledge, skills and competence, in accordance with the European Qualifications Framework, EQF. These requirements are expressed in such a way as to facilitate the processes of assessment and validation of learning outcomes.

### Subsector F13: ENVIRONMENTAL TESTS

Subsector : F13 (Secondary Subsector) Registration Date : 2022-06-08  
 Organization : NEN  
 Country : Netherlands  
 Project ID : 50002278/0001 Project Established  
 ICS : 07.100.01, 13.020.01, 13.060.01, 65.120, 67.050  
 National Ref : NEN 6603:2022 Concept en  
 Title : Environment and food - Internal quality control by the use of control charts with chemical and microbiological analyses  
 Scope : This code of practice gives guidelines for the quality control and chemical analysis within the laboratories by using control charts according to Shewart. The code applies to the implementation of chemical determinations in any kind of water or sludge and can be used for the own assessment of the quality system of the laboratory.

**Title :** Air quality - Measurement of stationary source emissions - Application of UNI CEI EN ISO/IEC 17025 to periodic measurements  
**Scope :** This technical specification integrates the requirements of the UNI CEI EN ISO/IEC 17025 standard and is suitable for demonstrating the competence of laboratories that carry out periodic measurements of emissions from fixed sources, including:
 

- collection of representative samples of the emissions and subsequent laboratory analysis;
- determination of the reference quantities such as temperature, pressure, water

---

vapor and oxygen content in the field;

- use of portable measuring instruments or those installed in mobile laboratories.

This document is applicable to laboratories that carry out:

- periodic measurement of emissions from fixed sources including those for the measurement of compliance with emission limit values;
- calibration of automatic measuring systems including that for verification of compliance with UNI EN 14181;
- verification of the environmental performance of a system or process in relation to its emissions into the atmosphere including the functional testing of an emissions abatement system where present;
- determination of the emission factors to be used in emissions trading and inventory reporting.

**Country :** Austria  
**Project ID :** 01000163/0001 **Project Established**  
**ICS :** 13.030.40  
**National Ref :** ÖNORM S 2077  
**Title :** Landfills - Polymeric sealings of concrete buildings with concrete protection liners - Requirements for the product and its installation  
**Scope :** The present ÖNORM standard describes the requirements and test methods as well as quality assurance measures for concrete protective liners (CPLs). Plastic sealings made of CPLs are considered to be structural, homogeneous concrete protection measures with a positive connection for the corrosion proofing and sealing of concrete buildings in all those cases in which solid, liquid or gaseous (e. g. radon) media occur on the side of the sealing and elevated operational stress exists, for example, because of:
 

- the occurrence of water-polluting liquids (e. g. leachate from landfills),
- abrasion,
- the risk of concrete corrosion,
- stress distribution (higher tension in the case of temperature changes),
- pressure alternation (alternating push/pull action).

 Examples for the application of CPLs (e. g. to protect groundwater) are:
 

- concrete basins,
- leachate storage tanks,
- shaft structures,

---

- ducts, pipes, flumes,
- collectors,
- foundation sealings,
- collecting basins.

Furthermore, the present ÖNORM shall apply to the proper installation of concrete protective liners (CPLs) by specialized installation companies according to ÖNORM S 2078 and to the quality assurance of CPL installation according to ÖNORM S 2077-1 for material groups A (PE-HD) and D (PE-HD el).

This ÖNORM may also be applied, mutatis mutandis, to the material groups B, C and D in which case the criteria relevant for welding have to be met in line with the applicable DVS standards.

Sealings made by means of CPLs are structural, homogeneous concrete protection measures with a positive connection for sealing concrete buildings.

**National Ref :** UNI1611109  
**Title :** Safety and health in the use of occupational exoskeletons related to facilitate work activities  
**Scope :** The technical report explores the state of the art of the occupational exoskeletons which are wearable service device that are proposed as technological solutions aimed at reducing the physical load or limiting the adoption of incongruous postures of a worker, in order to prevent possible musculoskeletal disorders in the workplace.  
 Potentially the occupational exoskeletons are able to offer a solution where other technical, organizational or ergonomic design measures are not feasible or effective in mitigating biomechanical overload risk factors.  
 With this in scope, the technical report aims to:  
 - provide information on the correct terminology and definitions to be adopted in the occupational exoskeletons sector;  
 - identify and describe the different types of exoskeletons currently developed and in use in the workplace (with particular reference to active and passive assets);  
 - illustrate the general principles of design and construction of exoskeletons;  
 - represent the working sectors of possible application of exoskeletons;  
 - frame the potential opportunities and problems related to the use of exoskeletons.

 Title : Urban road equipment. Vulcanized rubber prefabricated speed humps. Characteristics and test methods.  
 Scope : The purpose of this standard is to specify the technical characteristics and their methods, as well as the design and performance requirements, for prefabricated vulcanised rubber speed reducers permanently installed on the running surface for the purpose of traffic calming on urban roads. It also specifies the minimum information in the documentation accompanying the prefabricated vulcanised rubber speed reducers.  
 Only speed reducers prefabricated with vulcanised rubber, for permanent use on urban roads, incorporating retro-reflective elements are subject to this standard; the following are therefore excluded: those prefabricated with other types of elastomers or any other material, other than vulcanised rubber; those not equipped with retro-reflective elements; those intended for traffic calming on construction sites (temporary use); and those prefabricated for use in crossings in towns, as well as on peri-urban and inter-urban roads.

**Title :** Vertical signs. Stub end and hold up elements. Hypothesis of calculation.  
**Scope :** The purpose of this standard is to specify the calculation assumptions to be considered for any supporting and anchoring element used in vertical signalling.

This standard is applicable to:

gantries and banners with a gauge > 5,25 m;

beams or structures supporting lateral signs with a 1,5 m clearance;

poles supporting one-piece signs with a clearance of 0,7 m.

Any other type of supporting element must be assimilated to the closest case of the above.

The characteristics of the materials to be used in the manufacture of permanent or temporary vertical sign posts and banners are included, i.e. hot-rolled steel sections, hot-rolled sheet or coil, extruded aluminium sections, aluminium sheet and the corresponding screws and anchorages.
