**Scope :** This test standard applies to all types of machine-made paper, except curled or creped papers or other special types produced by techniques that differ from normal paper machine practice. Sample sheets are assumed to have been cut with their sides parallel or at right angles to the machine direction. To determine machine and cross directions, a clear difference in fiber orientation and / or paper elasticity is required.

It is applied to PVC-U, PE and PP piping systems used in the drainage and conduction of surface and underground water by gravity, for building works and civil engineering and agriculture.

The following are considered as building and civil engineering and agriculture works for the purposes of this standard:

- forest or agricultural cultivation areas, sports areas, gardens, green areas and swimming pools;
- roads, highways, expressways and freeways;
- construction and building works;
- other civil engineering works (airports, tunnels, walls, slopes, railways, etc.);
